

STATE OF CONNECTICUT

Regulation of Environmental Protection

Section 19-508-19 of the Regulations of Connecticut State Agencies is amended as follows:

Section 19-508-19. Control of sulfur compound emissions

(a) Fuel combustion.

(1) Definitions. As used in subsections (a) through (f) inclusive:

"Combustible" means the heat-producing constituents of a fuel.

"Combustion" means the rapid chemical combination oxygen with the combustible element of a fuel resulting in the production of heat.

"Fuel" means a substance containing combustibles used for producing heat, light, power or energy.

"Fuel merchant" means any person who offers for sale or sells, transfers, or provides in retail or wholesale trade fuel, including agents, brokers, wholesalers, distributors or producers who sell commercial or non-commercial fuel.

"Fuel user" means any person who stores or utilizes commercial or non-commercial fuel for the purpose of creating by combustion heat, light, power, or energy.

"Gross heat input" means the total energy requirement for a premise for twelve (12) consecutive months.

"Heat input" means the actual firing rate of the fuel burning equipment.

"Premise" means the grouping of all air pollutant emitting activities or sources at any one location and owned or under the control of the same person or persons.

"Stack" or "chimney" means a flue, conduit or opening permitting particulate or gaseous emission into the open air, or constructed or arranged for such purpose.

"Sulfur dioxide (SO₂)" means a colorless gas at standard conditions which has the molecular formula SO₂.

"Sulfur oxides (SO_x)" means any compound made up only of sulfur and oxygen which for the purpose of this regulation will be calculated as sulfur dioxide (SO₂).

(2) Fuel users

- (i) No person, except as provided in subparagraphs (a)(2)(ii), (a)(3)(i) and (a)(3)(ii), shall use or burn fuel which contains sulfur in excess of a maximum of one percent (1.0%) by weight (dry basis). Additionally, no fuel user shall cause or permit the installation or operation of any fuel burning equipment with a heat input of 250,000 BTU per hour or more which uses fuel containing any solid fuel without first obtaining the Commissioner's approval by the issuance of a stationary source operating permit for this purpose, unless the fuel user demonstrates to the Commissioner's satisfaction that the emission of sulfur compounds (expressed as sulfur dioxide) from such equipment are 1.1 pounds per million BTU of heat input or less.
- (ii) Under conditions of fuel shortage emergency, as determined by the Commissioner, higher percentages of sulfur may be permitted by express approval of the Commissioner for temporary periods.

(3) Use of fuel containing other than one percent (1%) sulfur.

- (i) Air pollution control/energy trade program. Notwithstanding the provisions of subsection (a)(2), the Commissioner may approve: (i) combustion of a mixture of fuels, or (ii) combustion of a single fuel, which contain(s) more than one percent (1.0 percent) sulfur by weight (dry basis) provided that:
 - (A) The emissions of sulfur compounds (expressed as sulfur dioxide) from a given premise do not exceed 0.55 pounds per million BTU of gross heat input;
 - (B) The owner or operator of the premise applies for and obtains, prior to the burning of such fuel, a stationary source operating permit for this purpose; and
 - (C) The emissions do not prevent or interfere with either the attainment or maintenance of any applicable air quality standard.
- (ii) Emission limitation. Notwithstanding the provisions of subdivision (a)(2) the Commissioner may approve the combustion of a single fuel or a mixture of fuels which contain(s) more than one percent (1%) sulfur by weight (dry basis) for any fuel burning equipment provided that the emissions of sulfur

compounds (expressed as sulfur dioxide) from such equipment do not exceed 1.1 pounds per million BTU of heat input.

- (iii) Ambient impact. Notwithstanding the provisions of subdivision (a)(2) or subparagraphs (a)(3)(i) and (ii) the Commissioner shall, by permit or order, limit the emission of sulfur compounds (expressed as sulfur dioxide) from any fuel burning equipment on a given premise to less than 1.1 pounds per million BTU of heat input for any source which interferes with the attainment or maintenance of any applicable air quality standard.

(4) Fuel merchants

- (i) No fuel merchant, except as provided in subparagraphs (a)(4)(ii) and (iii) shall store, offer for sale, sell, make available, deliver for use or exchange in trade for use in Connecticut fuel which contains in excess of one percent (1.0%) sulfur by weight (dry basis).
- (ii) In other than conditions of fuel shortage emergency described under subsection (a)(2)(ii), fuel merchants seeking to store, offer for sale, sell, deliver for use or exchange in trade, for use in Connecticut, and fuel users seeking to create by combustion heat, light, power, or energy from fuels containing sulfur in excess of the maximums set by subsection (a)(2) under the conditions specified in subsection (a)(3) shall obtain the prior approval of the Commissioner.
- (iii) The Commissioner may allow a fuel merchant to store, sell, or deliver fuel, which contains more than one percent (1%) sulfur by weight (dry basis) to any fuel user who has been authorized to use such fuel by:
 - (A) A variance pursuant to 19-508-13; or
 - (B) A permit pursuant to 19-508-3; or
 - (C) Approval pursuant to 19-508-19(a)(2)(ii); or
 - (D) Approval pursuant to 19-508-19(a)(3); or
 - (E) Authorization as a result of any other action taken by the Commissioner.

The Commissioner may take such action under this subparagraph without requiring any notice or hearing.

- (5) The Commissioner may require submission of fuel analyses, results of stack sampling, or both, prepared at the expense of the merchant or user, to ensure compliance with the provisions of subsection (a)(1) through (a)(7) inclusive, and no person shall fail to submit such data when requested to do so by the Commissioner.
- (6) Persons selling fuels in Connecticut shall maintain records of sales of all fuel containing sulfur and shall make these records available for inspection by the Commissioner or his representative during normal business hours. This section shall not apply to any of the following fuels which have sulfur contents below two-tenths of one percent (0.2%) by weight (dry basis): distillate oil, motor vehicle fuel, aircraft fuel, or gaseous fuel.
- (7) The provisions of subsections (a)(1) through (a)(6) inclusive shall not apply to fuels used by oceangoing vessels.
- (8) No person shall cause or permit the flaring or combustion of any refinery process gas stream or any other process gas stream that contains sulfur compounds measured as hydrogen sulfide in concentrations greater than 10 grams per 100 standard cubic feet (23 gm/100 scm) of gas.
- (9) (i) The provisions of subsections (a)(2)(i) above shall not apply to any coal burning equipment used primarily for educational or historical demonstrations or exhibits provided that the emissions from such fuel burning equipment do not interfere with either the attainment or maintenance of any applicable air quality standard. These sources shall include, but are not limited to, blacksmith's forges, steam locomotives, and steamboats, provided, however, that such sources do not use or burn fuel which contains sulfur in excess of one and one-half percent (1.5%) by weight (dry basis).
- (ii) As a prerequisite for exemption under the provisions of subsections (a)(9)(i), owners shall notify the Commissioner prior to commencement of said operation.
- (iii) The Commissioner may revoke or modify an exemption under subsection (a)(9) if he determines that operation of the source will (1) prevent or interfere with the attainment or maintenance of any applicable air quality air standards, or (2) create a substantial health problem.
- (iv) All fuel merchants are authorized to sell fuel to any owner or operator granted an exemption pursuant to subsection (a)(9) above. In addition to the requirements of subsection (a)(7) above, all records shall include the sulfur content of the fuel.

- (b) Sulfuric acid plants. No person shall cause or permit sulfur oxides emissions which exceed 6.5 pounds per ton (3.25 kg/metric ton) of one hundred percent (100%) acid produced.
- (c) Sulfur recovery plants. No person shall cause or permit the emission of sulfur oxides from a sulfur recovery plant to exceed 0.01 pounds (kg) per pound (kg) of sulfur processed.
- (d) Nonferrous smelters. No person shall cause or permit the emission of sulfur oxides from primary non-ferrous smelters to exceed that set forth according to the following equations.

Copper smelters: $Y = 0.2 X$

Zinc smelters: $Y = 0.564 X^{0.85}$

Lead smelters: $Y = 0.98 X^{0.77}$

Where X is the total sulfur fed to the smelter in lb/hr and Y is the allowable sulfur dioxide emission in lb/hr.

- (e) Sulfite pulp mills. No person shall cause or permit the total sulfite pulp mill emissions of sulfur oxides from blow pits, washer vents, storage tanks, digester relief, recovery system, etc., to exceed 9.0 pounds per air-dried ton (4.5 kg/metric ton) of pulp produced.
- (f) Other process sources. Notwithstanding the provisions of section 19-508-18(e), process sources not covered in subsections (b) through (e) inclusive shall not emit sulfur oxides (expressed in sulfur dioxide) in the stack effluent in concentrations which exceed 500 parts per million at standard temperature and pressure.
